The next meeting will be held on Wednesday, April 11, 2012 at the Golden Corral.
Come join us for dinner beginning at 6PM with the meeting to follow at 7PM.

Well its April already but seems spring/summer has been here for the past several weeks. I have talked with a lot of members that have had their cars out enjoying the great early season weather. I'm still trying to finish up my winter project so I can get my fastback back home and ready for the year.

This past Saturday we had our first club activity of the year, the chili and bowling. We had a lot of good chili and deserts out at the Sand Creek Conservation Club. After visiting with each other and letting the food we ate digest we went to the Columbus bowling center to bowl. This year Chuck Butler won the award for high score and my wife Amanda won the most room to improve award. I think everyone had a great time. I would like to thank Tammy Adams for organizing the chili lunch and Billy Danforth for arranging the conservation club for us. I will have Sandy add some pictures from the event to this news letter.

Coming up on the 28th of this month is the annual Cobweb tour. This is typically our first drive as a club for the year. It lets us get the cars out and blow the cobwebs off them. This is a mystery tour so only our event host will know where we are driving to. We will have all the details for this at the meeting on the 11th.

Kyle

Recipe Corner

THE DUGGER FAMILY LAUNDRY SOAP

1 Fels Naptha Soap bar, grated
1 cup washing soda
½ cup Borax

Grate the soap bar into a small sauce pan. Cover with hot water. Cook over medium-low heat, stirring constantly, until the soap completely dissolves. Put washing soda and borax in a 5 gallon bucket. Pour in the hot, melted soap mixture. Stir well, until all the powder is dissolved. Fill the bucket to the top with more hot tap water. Stir, cover securely, and let set overnight. The next morning, stir the mixture. Mix equal amounts of soap concentrate and water in a smaller laundry-detergent dispenser or container. Shake well before using.

For top-loading machines: use 1 cup of the soap mixture per load.
For front-loading machines: use ½ cup per load.
